In-Vehicle Computers

Redefine the means of traveling with reliability and efficiency

To cope with unexpected challenges and fulfill real-time security, Transcend's in-vehicle solutions feature wide temperature and thermal sensor, allowing devices to deliver stability and high tolerance even under extreme temperature changes.

Strict component protection
Corner Bond and 30μ" gold fingers reinforce the component structure.

Remarkable data transmission
Optimized firmware and exclusive software support intensive read/write commands.

Sustainable supply
Fixed BOM and product lifecycle management (PLM) guarantee product longevity and supply.
